

Kelvin Herdian Hamzah

Personal Data

Date of Birth : September 14th 1999
Nationality : Indonesia
Marital Status : Single
Gender : Male
Religion : Muslim
Postal Code : Vila Nusa Indah 3 Blok KN 9 No.23,
Kab.Bogor, Kec.Gunung Putri
Phone : +62 821 1300 8897
Email : kelvinherdian70@gmail.com
Foreign Language Proficiency: : English

Educational Qualification

Bachelor of Degree at Mercubuana University, Majoring in Informatic Engineering
GPA 3.66 (2018 – 2024)

Skills & Technical Qualification

Technical Skills:

- Hardware and software troubleshooting
- Windows Server & Active Directory administration
- Network configuration (LAN/WAN, TCP/IP, DNS, DHCP)
- Microsoft 365 & Outlook setup and support
- Remote desktop tools (AnyDesk, TeamViewer)
- IT asset and user account management
- Ticketing systems (e.g., Freshdesk, Zendesk)
- IT documentation and reporting

Programming Languages:

- Javascript (Intermediate)
- SQL Server (advance)
- MySql (advance)
- Styling Language – CSS (advance)
- PHP (Intermediate)
- Python (Intermediate)

Platform / Operating:

- Windows (7,8,10,11)
- Linux (Ubuntu, Debian)

Framework:

- Bootstrap (advance)
- Laravel (Intermediate)
- Ci (Intermediate)
- JQuery (Intermediate)

Application/Development Tools:

- Visual Studio Code (Intermediate)

- MS Office (Intermediate)
- Visual Studio (Intermediate)
- Xampp (Intermediate)
- Docker (basic)
- SQL Server Management Studio (Intermediate)
- Version Control – Git, Composer (Intermediate)
- Grafana (Intermediate)
- WordPress (Intermediate)

Soft Skills:

- Analytical and problem-solving skills
- Effective communication
- Team collaboration
- Time management and multitasking

Work Assignments

1. November 2023 – December 2024, as Web Developer at PT. Bintang Inovasi Teknologi

Achievements:

- Successfully delivered and launched web applications tailored to user requirements.
- Improved application performance by 30% through backend and frontend optimizations.
- Developed a real-time collaboration module that enhanced communication between team members and users.

Key Responsibilities:

- Developed and maintained full-stack web applications, covering both frontend and backend components.
- Collaborated closely with UI/UX designers, QA engineers, and project managers to ensure the applications met user needs.
- Integrated APIs and third-party services as requested by users.
- Authored technical documentation and conducted code reviews to maintain code quality.
- Participated in agile development processes, including sprint planning and daily stand-ups with the team.

Tools:

- Git, MySQL Server, Visual Studio, MS. Office, Figma.

2. September 2019 – November 2023, as IT Staff at National Disaster Management Authority (BNPB)

Held the position of IT Staff at BNPB, handling a range of responsibilities such as technical support and web development/programming.

- Provided technical support to employees, including hardware/software troubleshooting and network connectivity assistance.
- Developed and maintained internal websites using PHP, Laravel, and WordPress to support public information and internal operations.
- Assisted in managing user accounts and permissions through Windows Server and Active Directory.
- Created and updated technical documentation, user manuals, and system usage guidelines.
- Supported livestreaming and virtual meetings (Zoom, Google Meet) for national coordination and press conferences.
- Collaborated with other departments to identify and implement digital solutions for operational efficiency.

- Ensured IT assets and inventories were tracked and maintained properly.

PPID Web Application

Achievements:

- Solely developed and launched the official Public Information Disclosure (PPID) web application for BNPB, from initial concept to deployment.
- Ensured the platform complies with Indonesia's Public Information Disclosure regulations, enhancing accessibility and transparency.
- Successfully delivered the project independently, with minimal external support—except for requirement gathering through user meetings.

Key Responsibilities:

- Planned and developed the entire PPID web application independently, from requirements gathering (with users) to launch.
- Designed the system architecture and user interface to ensure ease of use and compliance with regulations.
- Created and managed the database using MySQL to handle information requests.
- Handled full-stack development using Laravel (PHP), JavaScript, HTML, and CSS.
- Managed deployment, server configuration, and version control with Git.
- Performed testing and fixed bugs to ensure smooth operation.
- Provided maintenance and updates after launch.
- Communicated with users for requirements and feedback.

Tools:

- Git, MySQL Server, Visual Studio, MS. Office, Figma.

BNPB Official Website

Achievements:

- Successfully launched the BNPB official website, enhancing public access to disaster-related information and resources.
- Improved website load times by 30% through optimization techniques, leading to better user engagement.
- Received commendation from BNPB leadership for delivering a high-quality, user-friendly website within the projected timeline and budget.

Key Responsibilities:

- **Project Initiation & Planning:** Spearheaded the end-to-end development of BNPB's official website by adopting Agile methodologies, specifically Scrum, including requirement gathering, scope definition, and timeline establishment.
- **Design & Architecture:** Conceptualized and implemented the website's architecture and user interface, ensuring alignment with BNPB's mission and user needs.
- **Database Management:** Designed and maintained relational databases using MySQL and PostgreSQL to support dynamic content and data integrity.
- **Full-Stack Development:** Independently developed both front-end and back-end components using PHP, JavaScript, HTML5, CSS3, and integrated frameworks like Laravel and Bootstrap.
- **Deployment & Hosting:** Managed the deployment process, including server configuration, domain setup, and implementation of CI/CD pipelines using Git.
- **Quality Assurance:** Conducted comprehensive testing phases, including unit, integration, and user acceptance testing, to ensure optimal performance and user experience.
- **Maintenance & Updates:** Established protocols for regular updates, security patches, and content management to keep the website current and secure. Implemented SEO best practices, including on-page optimization and keyword integration, to enhance search engine visibility. Utilized Google Analytics and

Google Search Console to monitor website performance, track user behavior, and inform data-driven improvements.

- Stakeholder Communication: Liaised with internal departments to gather feedback, provide training, and ensure the website met organizational objectives.

Tools:

- Git, MySQL Server, Visual Studio, MS. Office, Grafana, Figma.

BNPB Intranet Application

Achievements:

- Successfully developed and deployed the front-end of the BNPB intranet application, improving internal communication and data accessibility for staff.
- Enhanced user engagement by implementing intuitive UI designs and interactive features, leading to increased adoption of the intranet platform.
- Received positive feedback from stakeholders for delivering a user-friendly and efficient front-end interface within project timelines.

Key Responsibilities:

- Project Planning & Requirement Analysis: Collaborated with stakeholders to gather and analyze requirements for the intranet application, ensuring alignment with organizational objectives.
- UI/UX Design Collaboration: Worked closely with UI/UX designers to translate design mockups into interactive and responsive user interfaces, ensuring consistency with BNPB's branding and usability standards.
- Front-End Development: Developed and implemented user-facing features using HTML5, CSS3, and JavaScript, ensuring cross-browser compatibility and responsiveness across devices.
- Framework Integration: Utilized front-end frameworks such as Bootstrap and jQuery to enhance UI components and streamline development processes.
- API Integration: Collaborated with back-end developers to integrate RESTful APIs, facilitating seamless data exchange between the front-end and back-end systems.
- Performance Optimization: Optimized application performance by implementing best practices in code efficiency, reducing load times, and enhancing user experience.
- Testing & Debugging: Conducted thorough testing and debugging to ensure functionality, usability, and responsiveness across various browsers and devices.
- Version Control Management: Managed codebase using Git for version control, enabling efficient collaboration and code management.
- Deployment & Maintenance: Assisted in deploying the intranet application and provided ongoing maintenance to address user feedback and implement updates.

Tools:

- Git, Visual Studio, MS. Office, Figma, Photoshop.

Project

1. October 2023, Programmer – Self-Service Immigration Application at PT. Bintang Inovasi Teknologi, Contributed as a key member of the development team for the Self-Service Immigration Application, aimed at streamlining immigration service processes and improving user accessibility. Collaborated on front-end and back-end programming tasks, focusing on feature implementation, bug fixing, and performance optimization. Worked closely with stakeholders to ensure system requirements were met and maintained high standards for security and user experience.

Skills: Laravel, PHP, JavaScript, HTML5, CSS3, MySQL, Git, API Integration, Dashboard Development, Data Visualization, UX Design, UAT, Server Management.

2. October 2022, Lead Developer – PMK Web Application, Led the development of the official web application for the Satgas Penanganan Penyakit Mulut dan Kuku (PMK), supporting national coordination and data collection related to livestock disease outbreaks. Managed the project from concept to deployment, including user requirement analysis, system design, development, and integration with relevant agricultural and veterinary data systems. Ensured that the platform supported real-time reporting, role-based access, and a dashboard for regional task force coordination.
Skills: Laravel, PHP, JavaScript, HTML5, CSS3, MySQL, Git, API Integration, Dashboard Development, Data Visualization, UX Design, UAT, Server Management.
3. August 2020, Lead Developer – Whistleblowing System Application (Integrated with PANRB), Independently developed and launched BNPB's Whistleblowing System (WBS) application to support confidential internal reporting and strengthen institutional transparency. The system was successfully integrated with PANRB's centralized WBS platform, enabling seamless inter-agency data reporting and compliance with national anti-corruption standards. Managed the full development lifecycle, including system design, secure architecture, integration, deployment, and ongoing maintenance.
Skills: Laravel, PHP, JavaScript, HTML5, CSS3, MySQL, Git, API Integration, Information Security, UX Design, Server Configuration, UAT, Regulatory Compliance.
4. June 2020, Lead Developer – PPID Web Application Development Independently developed and launched the official PPID web application for BNPB to support public access to information in compliance with Indonesia's Public Information Disclosure regulations. Led the project end-to-end—from requirements gathering and system design to deployment and maintenance—ensuring regulatory compliance and user-friendly functionality. Delivered the platform with minimal external support and continued providing post-launch improvements based on user feedback.
Skills: Laravel, PHP, JavaScript, HTML5, CSS3, MySQL, Git, Server Configuration, UX Design, UAT, Requirement Analysis.
5. March 2020, Front-End Developer – COVID-19 Official Website (covid19.go.id) Contributed as the Front-End Developer for the official COVID-19 information portal of the Indonesian government (covid19.go.id), launched in collaboration with the COVID-19 Task Force and the Ministry of Communication and Information Technology (Kominfo). Focused on building a responsive, accessible, and user-friendly interface to deliver real-time pandemic data, public health protocols, and government announcements to the public. Ensured compatibility across devices and optimized performance for high traffic during critical periods.
Skills: HTML5, CSS3, JavaScript, Bootstrap, jQuery, Responsive Design, Web Performance Optimization, Cross-Browser Compatibility, Git, UI/UX Implementation.
6. January 2020, BNPB Official Website Development Successfully led the end-to-end development of the official BNPB website to enhance public access to disaster-related information. The project included frontend and backend development, database design, performance optimization, and stakeholder coordination. Website load times were improved by 30% through optimization, and the project received formal commendation from BNPB leadership for meeting quality, timeline, and budget expectations.
Skills: PHP, JavaScript, HTML5, CSS3, Laravel, Bootstrap, MySQL, PostgreSQL, Git, Google Analytics, SEO, Server Configuration, UAT.
7. September 2019 – December 2019 Led the design and development of the front-end for BNPB's internal intranet application, enhancing internal communication and data accessibility. Collaborated with stakeholders to gather requirements and translated them into responsive, user-friendly interfaces. Implemented interactive UI components using HTML5, CSS3, JavaScript, Bootstrap, and jQuery, ensuring cross-browser compatibility and responsiveness. Integrated RESTful APIs to facilitate seamless data exchange between front-end and back-end systems. Employed Agile methodologies, participating in sprint planning and daily stand-ups to ensure timely delivery of features.

Skills: Communication Skills, Team Work, Ma HTML5, CSS3, JavaScript, Bootstrap, jQuery, RESTful APIs, Git, Agile, Scrum.

Certificates

1. Certified Database Programming with PL/SQL, Oracle Academy (2021)
2. Certified Enterprise Storage Management (HPE Nimble Storage), Datacomm (2021)
3. Certified Virtual Machine (VM) Management & Deployment, Datacomm (2020)
4. Certified Firewall Security & Configuration (Palo Alto Networks), Datacomm (2020)
5. Certified Secure Computer User (CSCU), Ec-Council (2019)

Organization

1. Served as Chairperson of the Informatics Student Association

Experiences

1. Became an IT Team in the Satgas COVID-19.
2. Became an IT Team in the Satgas PMK.
3. Served as Special IT Staff to the Head of BNPB during disaster site visits.
4. Actively served as a trainer for disaster technology tools for BPBD teams across Indonesia.
